

NEW Diplomat™ UV-C

Sanitising Station

How often do you clean your laptop, Chromebook or tablet? I bet it's not that frequently. You might wipe your screen with the odd screen wipe every now and then, but actually cleaning the keyboard, come on admit it, not that often.

You will be surprised to know that your keyboard can harbour more germs than a public toilet seat! The recent Coronavirus pandemic has encouraged us to wash our hands with soap and water more often and wipe down surfaces such as worktops, desks, high traffic areas and doorknobs. Still, little has been said of the devices we use.

Viruses and bacteria left on laptops or similar devices increase when the devices are shared. This is why just as you wash your hands to stop the spread of germs, bacteria and viruses, you should also clean your devices.

Our NEW UV-C Sanitising Station

Sanitise your laptop or tablet in just 15 seconds

99% of bacteria and viruses are inactivated when exposed to high-intensity UV-C light. 18 Phillips UV-C bulbs ensure all areas of the device are sanitised, including the hard-to-reach places.

**In laboratory testing, our UV-C light sources inactivated 99% of SARS-CoV-2 virus on a surface with an exposure time of 6 seconds. Source www.phillips.com*

Simple to use

Simple and easy to use, place your hand in front of the sensor to activate and follow the straightforward instructions on the LCD screen. Place your device into the cleaning bay and leave the unit to do the rest.

Whilst waiting users should sanitise their hands, leaving them with clean hands to remove their sanitised device.

Benefits

- Sanitises most laptops and tablets
- Sanitises devices in 15 seconds
- Sanitises all areas of the device at once
- Works standalone
- Can be added to existing Diplomat™ Self-Service Lockers
- Choice of colours
- Can be painted to match your existing lockers or trolleys

Features

- No-touch operation
- Semi-automated solution
- Only a single standard power socket required
- Fitted with 18 Phillips UV-C bulbs
- Fail-safe and safety protection
- Senses when a device is placed in or taken out

The Diplomat™ UV-C helps provide a 'Covid safe' environment for us to work, learn, and teach, so make the Diplomat™ UV-C part of your IT strategy.
